Major Projects

Health care application and website

08/2025-12/2025

A full stack unified digital healthcare platform designed for government hospitals, integrating smart queue management, pandemic alerts, blood bank tracking, pharmacy access, emergency support, and AI-based patient assistance.

- Built a unified healthcare platform connecting patients, hospitals, and administrators
- Designed system workflows for appointment handling, report access, and emergency support
- Integrated intelligent features such as symptom assistance and queue optimization
- Developed secure data handling and structured information flow across modules
- Created user-focused dashboards for efficient interaction across multiple roles
- Implemented scalable architecture for handling multiple healthcare services

Gitrepo: - <https://github.com/Bijay-2005/HealthNet-Bijay.git>

E-learning web platform

12/2024 - 01/2025

A full-stack e-learning web platform for modern education and coaching institutes

- Structured deployment-ready system using containerization practices
- Developed a scalable full-stack e-learning platform supporting multi-role users (Admin, Faculty, Students)
- Designed secure backend architecture enabling structured content delivery and access control
- Implemented protected video streaming and integrated payment workflow

Gitrepo: - <https://github.com/someshsrichandan/Elearning.git>
